Good afternoon, Jane,

With time of the essence, along with the previously coordinated and agreed exclusion of the 328.6-335.4 MHz Band, we will concur right away subject to the attached listed frequencies also excluded only for those that fall within your system operation over 310 to 390 MHz.

I have also attached this condition to your coordination record and please confirm if this is acceptable.

Thank you for the notice.

Subject: Textron Systems Coordination

Good morning Sydney,

Clifford sent me your way, I am reaching out regarding several applications for frequency coordination from Textron Systems submitted under "Jason Euting" on May 13th. TRK 210333 and TRK 210335 are the last two remaining coordination approvals we are waiting for from the FAA and we are needing to deliver these documents to the FCC as soon as possible to meet our flight test window. Please let me know what you need from Textron Systems to get these applications completed as soon as possible.

Respectfully,

Jane Euting
