CLASSIFICATION: UNCLASSIFIED

Anne, Randy;

I have no issues with the use of 351 MHz and 362.25 MHz at the Raytheon facility with the identified radius. My coordination number for 0487-EX-CN-2017 is 17072701.

Thank You
Mark

Hi Mark and Randy,

Raytheon Missile Systems has been testing its Coyote UAS in Florence, AZ under an FCC license for months now. Thanks to your good offices, Raytheon has been operating on 351 MHz and 362.25 MHz for the testing. Raytheon has some need to test as well at its lab in Tucson. In June, we filed an application for that testing, 0487-EX-CN-2017. A copy of the exhibit is attached here to provide you with more background on the testing.

The FCC has asked us to coordinate this use with the MAG. What additional information can I provide that will help with the process?

Thank you both very much for your help through this process.

Best regards,

Anne
