Subject: NG-T Number Request

Mr. Le,
I'm not sure what information you may need, so I'm attaching what we gave the FCC for this request. Let me know if you need anything else.

Basically, Boeing is looking to test some Direction-Finding equipment with a Test Frequency of 1283.75 MHz and we require FAA Coordination to do so.
The Transmitter is a Signal Generator set to a Maximum Output Power of 1 Watt.

When possible, can you send me the NG-T Number to provide to the FCC?

Please let me know if you need any other information, and thank you for your assistance.
Michael
