Subject: FCC Class II Permissive Change Request for FCC ID: APYDMR0173 (original Grant date: January 16, 2009)

Dear Sirs:

This Permissive Change letter has been generated on behalf of Sharp Corporation for the following reason:

The originally granted product under FCC ID: APYDMR0173 is being updated to include the use of an alternate magnetron. The alternate magnetron is the:

LG Model: 2M246 Magnetron.

No other changes have been made to the product besides the change in the magnetron. The schematics and block diagrams previously submitted are still representative of the current design. To ensure continued compliance with the product standard the product has been re-evaluated for compliance with Part 18 Subpart C, 18.305. Please see the attached test report which includes all the test data and findings that show that the product continues to meet the applicable requirements for compliance.

Best Regards,

George Yang
Agent for Sharp Corporation
