Statement Regarding FCC / IC Compliance (CAN ICES-003 (B)/NMB-003(B))

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
-Reorient or relocate the receiving antenna.
-Increase the separation between the equipment and receiver.
-Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
-Consult the dealer or an experienced radio/TV technician for help.

You are cautioned that changes or modifications not expressly approved by the part responsible for compliance could void the user's authority to operate the equipment. FCC RF Radiation Exposure Statement:
1. To comply with the Canadian RF exposure compliance requirements, this device and its antenna must not be co-located or operating in conjunction with any other antenna or transmitter.
2. For body worn operation, this device has been tested and meets RF exposure guidelines when used with an accessory that contains no metal and that positions the handset a minimum of 10 mm from the body. Use of other accessories may not ensure compliance with RF exposure guidelines.

Attention: exposition au rayonnement radiofréquence
Pour un usage en mode porté, cet appareil a été testé et satisfait aux directives sur l'exposition aux RF lorsqu'il est utilisé avec un accessoire qui ne contient aucune pièce métallique et qui place le combiné à une distance minimale de 10 mm du corps. Pour un usage conforme aux directives sur l'exposition aux RF lorsqu'il est utilisé avec un accessoire différent, l'utilisation d'autres accessoires peut ne pas garantir la conformité aux directives d'exposition aux RF.
