## FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
-Reorient or relocate the receiving antenna.
-Increase the separation between the equipment and receiver.
-Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
-Consult the dealer or an experienced radio/TV technician for help.
To assure continued compliance, any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment. (Example- use only shielded interface cables when connecting to computer or peripheral devices).

This equipment complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
(1) This device may not cause harmful interference, and
(2) This device must accept any interference received, including interference that may cause undesired operation.

## Caution!

The manufacturer is not responsible for any radio or TV interference caused by unauthorized modifications to this equipment. Such modifications could void the user authority to operate the equipment.

Thanks for choosing 2.4G wireless keyboard with touch-pad and multi-media, please read the manual before using.

## Contents:

K2880G
wireless keyboards

receiver

Charger
USB cable

Charging pedestal

Charger(optional)

Manual

## Specification:

K2880G Keyboard

- 2.4G wireless, better anti-interference 10M effective distance
- Ergonomic and Mute design, more convenient
- Mute tech, providing comfortable touch feeling
- Power saving, extended battery lifetime.
- 500mA Li-on charger battery, keyboard charging pedestal and low battery indicator

G09UF Receiver

- Exquisite design,fashional and noble
- USB connector,convenient and easy.

Charger using manual:

- 500mA Li-on charger battery, it can be used for fifteen days, when charger voltage is low, the LED in the middle of mouse right and left keys will shine.
- When keyboard is charging, LED will flash in red color, after finished, LED will flash green. The whole time needs three or four hours.
- For power saving,please put the ON/OFF switch to "OFF" when do not use keyboard.

## charging specification:

When charger voltage is low,LED will flash red,please charging at once.

low voltage LED flash

Two ways for charging optional:
1. If there is charger,connecting charger into 220V power supply, and put charging connecting cable into charger pedestal.
2. For USB charger,one side connecting to the charger pedestal,the other Side to the computer USB port

### Announcement:

1. When charging, please move to ON switch
2. After charging finished,the LED will turn To green

Move to ON switch

## Working Environment:

In order to experience a new and comfortable feeling, please check these aspects as follow, so that you can use better wireless keyboard combo.

- The receiver should be far away from the Monitor, outside disc driver or other electronic products, in order to prevent the radio disturbance produced by other electronic products the suggested distance is above 20 centimeters
- The radio signal can penetrate lignin, glass and so on the non-metallic objects, achieves 360 degree free transmit, but it can not penetrate the metal materials, so please do not put the mouse and the receiver onto the metallic tabletop ;
- Please be sure there is no big size metal between the keyboard and receiver, otherwise the connection will be affected.
- The standardized receiving distance we offered is under certain radio disturbance environment, the normal environment are better, the actual receiving distance is higher than standardized, but if mix-machine, motor, electric drill and other strong electronic equipments operating nearby, which may lead to slowly receiving or other abnormal.
