Panel 12

Bracket mounting

Installation procedure:

1. Keep bracket A in the same direction as the fixed lens, then bring the camera and bracket A together, and then turn bracket A to hold them both in place.

2. Put the other end of bracket A together with the slot of bracket B, and then just push it down.

3. Attach the bracket B to the wall and make a mark on the hole to ponch holes, and use a 6mm drill bit to get the holes,then Stuff the rubber stopper into the hole.

4. Select a suitable location and install expansion screws on the wall. for example, if it's a wooden wall,expansion screws are not requirement.

5. Align the bracket with the hole position and tighten the screws.

Panel 13

Note: Please scan the QR code inside the box to view the tutorial video for installing the bracket.
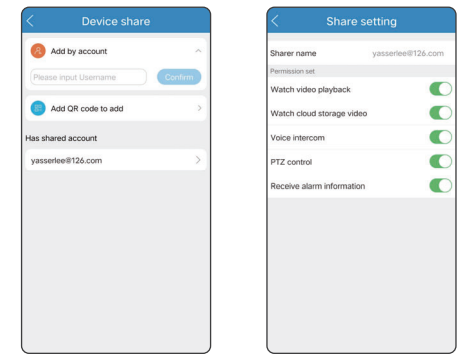

bracket B
bracket A

Look out: The wall on which the camera is installed must be able to withstand at least three times the total weight of the camera and not less than 50N or 5KG.

Panel 16

How to use it correctly

1. This product is suitable for outdoor scenes, " waterproof".

2. It should be installed in a ventilated environment as much as possible to avoid unstable factors caused by long-term closed high temperature replacement.

3. The camera and the router should be controlled within 10 meters of the partition wall, and the open environment should be kept within 20 meters.

4. When using at night, do not place items in front of the camera lens and do not face the wall, glass window, mirror, etc., so as not to block the reflection of infrared rays and affect the image quality.

5. The installation area should be away from high-power equipment to avoid signal interference and affect the use experience.

Panel 17

Q1: What should I do if WiFi configuration failed?
A1: Make sure GPS Location service is on and "Allow" is selected for all app permissions;
Check the WiFi password is entered correctly, no more than 31 digits, and letter cose;
After all steps above completed, check router settings, such os: "blacklist", "firewall", "Device Internet restrictions", etc.

Q2: How to do if the camera is offline always?
A2: Please check connection of the camera adapter and socket, or replace the power supply.
Check the wifi signal strength, make camera closer to router.

Q3: How could multiple users view at the same time?
A3: Please use share funtion to other users.
