RE: Only Bluetooth LE can be used on the BGM220P

To whom it may concern:

MagTek declares that only Bluetooth Low Energy mode on the BGM220P MT is used. For **FCC ID: U73-21074YXX** and **IC: 23169-21074YXX**, the BGM220P MT module is used which only has Bluetooth low energy and does not allow access to any other protocol. There is no place in the specification that mentions any other mode besides Bluetooth low energy. There is no method to change from the Bluetooth Low energy protocol in hardware, firmware, or software.

I attest that the above information is true and correct.

Sincerely,

A handwritten signature in black ink that reads "Kevin Gin". The signature is written in a cursive style.

Kevin Gin
