

Exhibit

On May 1, 2020 10Band LLC filed an application for a transfer of control of the indirect parent company of 10Band, File No. 0028-EX-TU-2020. Ownership interests in the parent were held by four individuals, William J. DiSomma, Paul A. Gurinas, William R. Shepard, and Kirk F. Malcolm, who proposed to transfer their interests to revocable trusts established by each such individual.

The transfer application referenced four experimental license call signs; it was granted May 6, and the trusts have since been established. Inadvertently the application omitted a fifth call sign (WJ2XXI) which 10Band had just recently acquired. This application is submitted to include that new call sign.

Additional details regarding the transfer are set forth in the attached copy of the Exhibit which accompanied File No. 0028-EX-TU-2020.

This transfer of control application relates to proposed assignments of interests in the indirect parent (ECW Wireless LLC) of the licensee (10band LLC), which are currently held by four individuals, to revocable trusts established by each such individual. Such interests represent all of the voting interests in ECW Wireless LLC. There will be no change in the management of the licensee. Each individual will serve as the trustee of each respective trust as well as retain the authority to revoke the trust and appoint successor trustees.

The following page illustrates the pre-transfer ownership and the proposed post-transfer ownership.
