To operate at 2200-2290MHz Telemetry Band in Dallas, Texas.

ATTN.: Microwave Branch

3G Wireless, LLC hereby requests Special Temporary Authority (STA) to operate within the 2200-2290MHz telemetry band pursuant to Section 21.25 of the Commission's Rules. 3G Wireless, LLC requests that the Commission grant it temporary authority to operate on the frequencies centered on 2276MHz and 2286MHz with an 8MHz bandwidth from March 28, 2017 through April 03, 2017 with intermittent usage. As explained below, 3G Wireless, LLC is filing an STA request to provide RF camera coverage for the 2017 Women's NCAA Final Four. 3G Wireless, LLC submits that there are extraordinary circumstances warranting a grant of the STA request.

ESPN has contracted 3G Wireless, LLC to provide multiple wireless camera systems for coverage of the 2017 Women's NCAA Final Four in Dallas, Texas. Due to the extreme frequency congestion in the Dallas Area, coupled with the added congestion from traditional Television and News coverage of area events, 3G Wireless requests the use of these channels.

3G Wireless, LLC certifies that the operation of the requested channel for the purposes specified herein will not cause interference to any established stations.

Grant of the instant request for STA for 2.2GHz telemetry bands would serve the public interest by enabling 3G Wireless, LLC to supply the requested remote camera system for the event. The proposed service would enhance coverage of the events by providing on the spot pictures and camera control from mobile locations that would not otherwise be available to the production company.

In accordance with Section 74.633 of the Commission's Rules, the following is provided:
