In re Application of 3G Wireless, LLC 501 McCormick Drive, Suite B, Glen Burnie, Maryland 21061

To Operate in the 2260-2270MHz

Bands to Provide TV Coverage in Omaha, Nebraska.

ATTN.: Microwave Branch

3G Wireless, LLC hereby requests Special Temporary Authority (STA) to operate in the 2260-2270MHz Telemetry Band pursuant to Section 21.25 of the Commission's Rules. 3G Wireless, LLC requests that the Commission grants it temporary authority to operate on the frequency centered at 2256MHz and 2266MHz with an 8MHz bandwidth from June 15, 2021 through July 1, 2021 with intermittent usage. As explained below, 3G Wireless, LLC is filing an STA request for the Live Television Transmission of ESPN's coverage of the 2021 Men's College World Series at the TD Ameritrade Park in Omaha, Nebraska. 3G Wireless, LLC submits that there are extraordinary circumstances warranting a grant of the STA request. ESPN has contracted 3G Wireless, LLC to provide the necessary microwave for the Live Television Transmission of this event. Due to the extreme frequency congestion in Omaha area, coupled with the added congestion from traditional Television and News coverage of the special event, 3G Wireless requests the use of channels in the 2260-2270MHz Telemetry Bands. 3G Wireless, LLC certifies that the operation of the requested channels for the purposes specified herein will not cause interference to any established stations.

Grant of the instant request for STA in the 2.2GHz Band would serve the public interest by enabling 3G Wireless, LLC to supply the requested remote video coverage for this event. The proposed service would enhance coverage of the event by providing on the spot pictures from mobile locations that would not otherwise be available to the Production Company.

In accordance with Section 74.633 of the Commission's Rules, the following is provided:
