To operate on 2266MHz, 2276MHz and 2286MHz throughout the continental United States on an "as needed" basis.

ATTN.: Microwave Branch

3G Wireless, LLC hereby requests Special Temporary Authority (STA) to operate in the 2200-2290MHz band pursuant to Section 21.25 of the Commission's Rules. 3G Wireless, LLC requests that the Commission grant it temporary authority to operate on the frequencies centered at 2266MHz, 2276MHz and 2286MHz with an 8 MHz bandwidth from September 25, 2016 through October 20, 2016 with intermittent usage. As explained below, 3G Wireless, LLC is filing an STA request to provide three RF camera systems throughout the country for the Presidential Debates to be broadcast by Fox News. 3G Wireless, LLC submits that there are extraordinary circumstances warranting a grant of the STA request.

Fox News has contracted 3G Wireless, LLC to provide wireless camera systems to operate within four Universities throughout the continental United States for their coverage of the impending Presidential Debates. Due to the extreme frequency congestion throughout the United States, coupled with the added congestion from traditional Television and News coverage of area events, 3G Wireless requests the use of these channels.

3G Wireless, LLC certifies that the operation of the requested channel for the purposes specified herein will not cause interference to any established stations.

Grant of the instant request for STA for 2266MHz, 2276MHz and 2286MHz would serve the public interest by enabling 3G Wireless, LLC to supply the requested remote camera systems for television coverage. The proposed service would enhance coverage of the events by providing on the spot pictures and camera control from mobile locations that would not otherwise be available to the production company.

In accordance with Section 74.633 of the Commission's Rules, the following is provided:
