To operate in the 1.4GHz Band, 2.2GHz Band and the UHF Band to provide TV coverage in New York City, New York.

ATTN.: Microwave Branch

3G Wireless, LLC hereby requests Special Temporary Authority (STA) to operate in the 1.4GHz Band, 2.2GHz Band, and the UHF Band pursuant to Section 21.25 of the Commission's Rules. 3G Wireless, LLC requests that the Commission grant it temporary authority to operate on the frequencies centered at 2265MHz and 2282MHz with a 16MHz bandwidth, 1488MHz, 1503MHz and 1518MHz with a 14MHz bandwidth from December 26, 2015 through January 02, 2015 with intermittent usage. Additionally, 3G Wireless, LLC requests that the Commission grant it temporary authority to operate on the frequencies centered at 501.1250MHz, 501.3375MHz, 501.4125MHz, 501.5250MHz, 501.5875MHz, 507.1250MHz, 507.3375MHz, 507.4125MHz, 507.5250MHz, 507.5875MHz, with a 12.5KHz bandwidth from December 26, 2016 through January 02, 2017 with intermittent usage. As explained below, 3G Wireless, LLC is filing an STA request for the Live Television Transmission of a Fox News Television Event, "All-American New Year's Eve" to be held in Times Square in New York City. 3G Wireless, LLC submits that there are extraordinary circumstances warranting a grant of the STA request.

Fox News has contracted 3G Wireless, LLC to provide the necessary wireless systems for the Live Television Transmission of this Event. Due to the extreme frequency congestion in the New York City area, coupled with the added congestion from traditional Television and News coverage of the special event, 3G Wireless requests the use of channels in the 1.4GHz, 2.2GHz and UHF Bands.

3G Wireless, LLC certifies that the operation of the requested channel for the purposes specified herein will not cause interference to any established stations.

Grant of the instant request for STA in the 1.4GHz, 2.2GHz and the UHF bands would serve the public interest by enabling 3G Wireless, LLC to supply the requested remote video and audio coverage for this Event. The proposed service would enhance coverage of the event by providing on the spot pictures from mobile locations that would not otherwise be available to the production company. 3G Wireless, LLC is in the process of obtaining the consent of the relevant frequency coordinators for this project, including AFTRCC. AFTRCC has indicated its intent to forward the results of the coordination to the Commission.

In accordance with Section 74.633 of the Commission's Rules, the following is provided:
