STA Application No. 0709-EX-ST-2006 – Request for expedited action

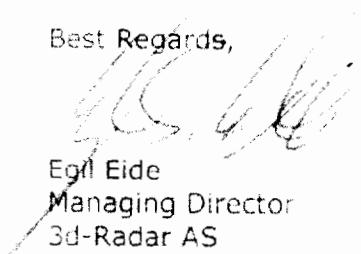

3d-Radar AS has submitted an application for a Special Temporary Authority in order to operate our GPR on bridge and road inspection research projects conducted by Rutgers University, NJ.

The operations are planned to start on Monday 23rd October with bridge surveys. The practical arrangements including logistics and traffic control for these surveys have already been set, and it would be very expensive to cancel the whole operation. Hence, it is very important for us to have an STA before next week.

We would therefore kindly ask for expedited action in order to solve this urgent matter.

Alternatively, if it is difficult to grant the general 6-months STA at this stage, we would be very grateful to have an STA that covers one month in order to secure the short term need for the bridge surveys.

Best Regards,

Egil Eide
Managing Director
3d-Radar AS
