To Operate in the 1435-1525MHz and the 2360-2390MHz Telemetry Bands to Provide TV Coverage in the Los Angeles, California.

ATTN.: Microwave Branch

3G Wireless, LLC hereby requests Special Temporary Authority (STA) to operate in the 1435-1525MHz Telemetry Band pursuant to Section 21.25 of the Commission's Rules. 3G Wireless, LLC requests that the Commission grant it temporary authority to operate on the frequencies centered at 1445MHz and 1465MHz with a 16MHz bandwidth and 2367MHz and 2384,MHz, with a 16MHz bandwidth from April 29, 2017 through April 30, 2017 with intermittent usage. As explained below, 3G Wireless, LLC is filing an STA request for the Live Television Transmission of a Pixel Corporation event in Los Angeles, California. 3G Wireless, LLC submits that there are extraordinary circumstances warranting a grant of the STA request.

Pixel Corporation has contracted 3G Wireless, LLC to provide the necessary microwave for the Live Transmission of this event. Due to the extreme frequency congestion in Los Angeles, coupled with the added congestion from traditional Television and News coverage of the special event, 3G Wireless requests the use of channels in the 1435-1525MHz and the 2360-2390MHz Telemetry Bands.

3G Wireless, LLC certifies that the operation of the requested channels for the purposes specified herein will not cause interference to any established stations.

Grant of the instant request for STA in the 1.4GHz and the 2.3GHz Bands would serve the public interest by enabling 3G Wireless, LLC to supply the requested remote video coverage for this event. The proposed service would enhance coverage of the event by providing on the spot pictures from mobile locations that would not otherwise be available to the Production Company. 3G Wireless, LLC, is in the process of obtaining the consent of the relevant frequency coordinators for this project, including AFTRCC. AFTRCC has indicated its intent to forward the results of the coordination to the Commission.
