To operate at 2262MHz and 2282MHz throughout the continental United States on an “as needed” basis.

ATTN.: Microwave Branch

3G Wireless, LLC hereby requests Special Temporary Authority (STA) to operate at 2262MHz and 2282MHz MHz pursuant to Section 21.25 of the Commission’s Rules. 3G Wireless, LLC requests that the Commission grant it temporary authority to operate on the frequencies centered at 2262MHz and 2282MHz with an 8 MHz bandwidth from April 5, 2019 through September 22, 2019 with intermittent usage. As explained below, 3G Wireless, LLC is filing an STA request to provide two RF camera systems to various Race tracks throughout the country during the Moto America season for LDM Worldwide Corp’s presentation of “Moto America Racing”. 3G Wireless, LLC submits that there are extraordinary circumstances warranting a grant of the STA request. LDM Worldwide Corp. has contracted 3G Wireless, LLC to provide two wireless camera systems to operate within the Moto America race tracks throughout the continental United States for their telecasts. Due to the extreme frequency congestion throughout the United States, coupled with the added congestion from traditional Television and News coverage of area events, 3G Wireless requests the use of these channels.

3G Wireless, LLC certifies that the operation of the requested channel for the purposes specified herein will not cause interference to any established stations. Grant of the instant request for STA for 2262MHz and 2282MHz would serve the public interest by enabling 3G Wireless, LLC to supply the requested remote camera systems for television coverage. The proposed service would enhance coverage of the events by providing on the spot pictures and camera control from mobile locations that

would not otherwise be available to the production company.

In accordance with Section 74.633 of the commission's Rules, the following is provided:
