In Application of 3G Wireless, LLC. 501 McCormick Drive, Suite B, Glen Burnie, Maryland 21061

To Operate in the 1436-1524 MHz and 2232-2250MHz Telemetry Band to Provide TV Coverage in the Continental United States.

ATTN.: Microwave Branch

3G Wireless, LLC hereby requests Special Temporary Authority (STA) to operate in the 1436-1524 MHz and 2232-2250MHz Telemetry Band pursuant to Section 21.25 of the Commission's Rules. 3G Wireless, LLC requests that the Commission grant it temporary authority to operate on the frequencies centered at 1440MHz, 1460MHz, 1470MHz, 1480MHz, 1490MHz 1500MHz, 2236MHz and 2246MHz with an 8MHz bandwidth on April 29, 2021 until May 1, 2021 with intermittent usage. As explained below, 3G Wireless, LLC is filing an STA request for the Live Television Transmission of NFL Network's coverage of the 2021 NFL Draft. 3G Wireless, LLC submits that there are extraordinary circumstances warranting a grant of the STA request. The NFL Network has contracted 3G Wireless, LLC to provide the necessary microwave for the Live Transmission of this event. Due to the extreme frequency congestion in the Cleveland area, coupled with the added congestion from traditional television and news coverage of the special event, 3G Wireless requests the use of channels in the 1436-1524 MHz and 2232-2250MHz telemetry band. 3G Wireless, LLC certifies that the operation of the requested channels for the purposes specified herein will not cause interference to any established stations.

Grant of the instant request for STA in the 1.4MHz and 2.2MHz Band would serve the public interest by enabling 3G Wireless, LLC to supply the requested remote video coverage for this event. The proposed service would enhance coverage of the event by providing on the spot pictures from mobile locations that would not otherwise be available to the Production Company.

3G fully intends to notify and send AFTRCC all proper paperwork for the 1.4MHz band.

In accordance with Section 74.633 of the Commission's Rules, the following is provided:
