To Operate in the 410, 2200-2253, 2255-2293 MHz Telemetry

Band to Provide TV Coverage in the Continental United States.

ATTN.: Microwave Branch

3G Wireless, LLC hereby requests Special Temporary Authority (STA) to operate in the 410 MHz, 2200-2253MHz, and 2255-2293MHz Telemetry Band pursuant to Section 21.25 of the Commission's Rules. 3G Wireless, LLC requests that the Commission grant it temporary authority to operate on the frequencies centered at 410 MHz with a 1 MHz bandwidth, 2208.5 MHz, 2226.5 MHz, 2244.5 MHz with an 17MHz bandwidth as well as 2259 MHz, 2269 MHz, 2279 MHz and 2289 MHz with an 8MHz bandwidth on January 13, 2020 with intermittent usage. As explained below, 3G Wireless, LLC is filing an STA request for the Live Television Transmission of ESPN College Football covering the "College Football National Championship" football game at Mercedes Benz Superdome in New Orleans, LA. 3G Wireless, LLC submits that there are extraordinary circumstances warranting a grant of the STA request. ESPN/ABC has contracted 3G Wireless, LLC to provide the necessary microwave for the Live Transmission of this event. Due to the extreme frequency congestion in the New Orleans area, coupled with the added congestion from traditional television and news coverage of the special event, 3G Wireless requests the use of channels in the 410MHz, 2200- 2253MHz and 2255-2903MHz telemetry band. 3G Wireless, LLC certifies that the operation of the requested channels for the purposes specified herein will not cause interference to any established stations.

Grant of the instant request for STA in the 410 MHz and 2.2MHz Band would serve the public interest by enabling 3G Wireless, LLC to supply the requested remote video coverage for this event. The proposed service would enhance coverage of the event by providing on the spot pictures from mobile locations that would not otherwise be available to the Production Company.
