

Description of the Application

By the instant application, 4-D Security Solutions, Inc. ("Applicant") is seeking Commission authorization to modify its experimental license for Station WD2XZC. Specifically, Applicant proposes to add a medium range radar beacon (EL/M 2127) to its existing network of radar systems at 1760 New Durham Road, South Plainfield (Middlesex County), New Jersey (geographic coordinates: 40-32-55 N. Lat., and 74-25-21 W. Long.)

It should be noted that the proposed transmitter output power and the ERP for these facilities are only 0.5 watts and 7 watts, respectively.

In addition, Applicant expects to complete its experimental requirements with respect to the proposed facilities within 12 months of the FCC grant of the instant application. Therefore, the requested licensing period for this radar facility is only 12 months.
