RE: American Portable Telecom, Inc. ("APT") -
Broadband PCS Experimental Program - Chicago, IL BTA

Dear Mr. Lowry:

On behalf of Pocket Communications, Inc. ("Pocket"), this is in response to your inquiry regarding the proposed experimental test program of APT in the Chicago, IL BTA. We have no objection to the grant of the experimental authority by the FCC for your test program provided that APT supplies Pocket with information consistent with what is needed for the STA filing, coordinates proposed frequencies with Pocket and recognizes that in the event interference occurs during testing, APT must immediately cease operations. Coordination information should include site addresses, latitude, longitude, antenna height AGL, ground elevation AMSL, maximum EIRP (dBm), frequency and testing dates. Such information shall be supplied to Pocket in a timely fashion and no later than 30 days prior to commencement of testing.

In the event you have any questions, please call me at 202/496-4333.

Sincerely,

A handwritten signature in cursive script, appearing to read "Carlos A. Pichardo".

Carlos A. Pichardo
Senior Vice President and General Manager
