Subject: Additional Information Request

---

Message:

Please address the following questions/concerns

- 1) Each one of the three frequency request is too broad. Reduce this request. Please enter the specific discrete frequency that you would like to test otherwise there is high probability that this will get tabled at NTIA. You should be able to do that since you mention in your narrative "actual testing will be conducted on discrete frequencies in each of the bands"
- 2) What the total number of equipment per location? What is the number of equipment amongst all your locations?
- 3) Describe the need for 15 different location request. Could this experiment be conducted with just 7 or even less location request?

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of February 26, 2020 may result in application dismissal pursuant to Section 5.67 and forfeiture of the filing fee pursuant to Section 1.1108.
