Ref: File # 5713-EX-MR-97

Dear Mr Young:

Please pardon the lack of response to your query about the above referenced file number. The person to whom you spoke is no longer with the company. Kindly remove **Nick Kearsley** from Item 20 and accept this as an amendment to the original application.

Our telephone area code is now **440**. Please make required change(s).

In the matter of power level requirements and the request for additional frequencies per our telephone conversations, examination of near future needs indicate that we can be comfortable with an ERP limit of **4 kW**. Considering experimental antenna gains, that power level is entirely possible. Per the latest chart in **Part 2** of the Rules, experimentation on our antenna range has potential on: ~~2500-2700~~, ~~2900-3100~~ and ~~3300-4200~~ MHz. As requested, two government-only band allocations have been omitted. Please amend our request accordingly. *2690*

*MMB, WTB
IB*

We hope this modification of our original request meets with your approval and will result in timely reinstatement of our authorization.

Thank you in advance for your early attention to this matter. If we can provide any additional information to expedite the process, please do not hesitate to contact either of the undersigned.

Yours truly,
