Subject: Additional Information Request

Message:

We have amended the application to specify changes to output power and ERP. Also, as a point of clarification, the proposed trial will operate from two fixed base stations and will also include a limited number of customer premises units. The CPE units are temporary-fixed and will be moved from time to time to locations within a 10 km radius around a base station. We used the term Mobile on the form to differentiate them from the base stations for which we can provide a set of coordinates, as opposed to a radius of operation.

Additionally we have revised the start and completion dates for the trial, to reflect commencement on March 1, 2022.
