

# Description of Requested Change to License

Our current experimental license is for us to test our Synthetic Aperture Radar system in the vicinity of Spanish Fork, Utah. We wish to add an additional location to the license to facilitate testing of our system at Eglin Air Force Base in Florida.

ARTEMIS, Inc. was directed to make this change by the spectrum management at Eglin AFB.

The FCC Experimental License for ARTEMIS, Call Sign WI2XXH, File Number 0233-EX-CR-2019, needs to be updated to include Eglin AFB as an operating location.

Eglin AFB, Florida      North 30 38 47      West 86 19 19

Max altitude 5,000 ft. AGL
