The radiating system (ARTEMIS SlimSAR-Ku) will be operated within a 15 nautical mile radius of Elberta, UT (39.952 deg N / 111.956 deg W). This boundary consists mainly of sparsely-populated, rural areas. The class-D airspace surrounding Provo Municipal airport (KPVU) and the uncontrolled airspace surrounding Spanish Fork-Springville Municipal airport (U77) are outside of this operating radius. The aircraft will operate from the Spanish Fork-Springville Municipal airport (U77), but the radar system will not radiate until the aircraft is within the operating radius.
