WD2XSL & WD2XWQ

File Numbers: 0063-EX-ML-2006 & 0062-EX-ML-2006

AT&T respectfully requests that the following experimental modifications be granted expeditiously.

Call Sign: WD2XSL
File Number: 0063-EX-ML-2006
Confirmation Number: EL444459
File Date: May 23, 2006

Call Sign: WD2XWQ
File Number: 0062-EX-ML-2006
Confirmation Number: EL424187
File Date: May 24, 2006

The modifications are for the addition of an additional experimental location at our headquarters offices in Bedminster, NJ to test new and developing technologies and enhancements, including procedures to evaluate the performance of WCMA equipment in delivering multi-media content to mobile devices, correlate the actual performance of various systems with predicted performance, assess the effectiveness of various technologies and designs in providing high speed data, multi-media delivery and voice services, and evaluate the installation, provisioning, monitoring and maintenance of systems tested.

AT&T has invested over \$100,000 at the new location to provide a system that we propose to demonstrate to our customers in March, 2007. We are concerned that further delay in FCC approval for these license modifications will affect these plans and impair our ability to provide innovative and competitive service to our customers. AT&T requests that these applications be granted expeditiously to allow this demonstration to proceed.
