Washington, DC 20554

Attention: Ms. Kimberley Baum

On the basis of a telephone conversation with your office, we understand that the eleven AT&T Corp. Applications for Consent to Assign the below listed experimental licenses to NS-MPG Inc. were granted on February 2 and that licenses in that name have been or shortly will be mailed to the assignee at the address shown on the Forms 702.

The temporary NS-MPG Inc. name for AT&T's systems and technology business has now been changed. The official name now is Lucent Technologies Inc. Please issue new licenses showing the present name. The assignee's mailing address remains the same.

If you have any questions, please call me.

Pittsburgh, PA 12521-5320

This letter serves to explain, in relevant part, the restructure of AT&T Corp. ("AT&T") and the resulting need to assign certain radio licenses now held by AT&T to a new corporation.

AT&T intends to establish in a new, separate corporation its present communications systems and technology business, including the associated R&D functions. Those activities are presently conducted by business units and divisions within AT&T, which holds the radio station licenses used in connection therewith. The steps in this restructuring are:

1. A new wholly owned AT&T subsidiary to conduct those activities has been established. The present name of that subsidiary is NS-MPG Inc.

2. The resources needed by NS-MPG Inc. to conduct its business will be transferred to it and it is expected to be operational early in 1996.

3. Thereafter, AT&T may offer approximately 15% of the stock of NS-MPG Inc. to the public.

4. In any event, on or before January 1, 1997, AT&T will distribute the balance of the stock of NS-MPG Inc. to the existing AT&T shareholders.

Commission consent to the transfer of the radio station licenses identified in this application will assist the new corporation to operate efficiently and thus is consistent with the public interest.

Washington, DC 20554

Attention: Ms. Kimberly Baum

Because the official name of Lucent Technologies Inc. was not determined until a few days after eleven experimental licenses were issued in the temporary name of NS-MPG Inc., my February 8, 1996 letter (copy attached) requested issuance of new licenses in that official name. Such new licenses have not, however, been received and I ask that they be issued as soon as convenient.

The assignee's address remains as shown on the previously filed Forms 702, namely:

Lucent Technologies Inc.
2 Gatehall Drive
Parsippany, NJ 07054-4513
Attn: Thomas J. Scurlock, Jr.
