Subject: Additional Information Request

Message:

Mr. Sangani,

As per your conversation with our Engineer, We would use up to 300 MHz within the 600 MHz bandwidth allocation of the NR n79 (4400-5000 MHz) band (aggregating up to three 100 MHz channels).

We would use up to 1000 MHz within the 3250 MHz bandwidth allocation of the NR n258 (24250-27500 MHz) band (aggregating up to ten 100 MHz channels).

Thank you,

Angelina Alvaran
