Subject: Additional Information Request

Message:

Mr. Sangani,

Please see below response on the correspondence with reference number 64728.

[1] We've amended the application and removed Blinq and Taqua from the license.

[2] There are multiple antenna integrated in the box of Access Point in UNII-5 (5.925 – 6.425GHz) and UNII-7 bands (6.625 – 6.875GHz). The maximum gain of these integrated antennas is 5dBi at the maximum bandwidth 320MHz.

[3] The antenna gain under the test in UNII-3 (5.725 – 5.825GHz) is lower than 5dBi.

Thank you.
