The KI2XIW license is required to continue the development and evaluation of an advanced millimeter wave radar guidance sensor for precision munition applications on behalf of the Department of the Army, U.S. Army Tank-Automotive and Armaments Command, Armament Research, Development and Engineering Center, Picatinny Arsenal, New Jersey, under contract number DAAE30-98-C-1074. The period of performance is presently through May 2002, but the Army is now processing a contact modification to extend the period of performance through at least April 2003.
