

July 22, 2020

To:
From: Avwatch, Inc.
Subject: License Justification

To Whom It May Concern:

Avwatch, Inc. is an aviation and communication technology company that provides aerial testing and evaluation of technological innovation for the US Government and its suppliers. We have had and are currently on multiple government contracts including:

Coast Guard contract # HSCG23-17-C-RJ6013

Marine Corps contract # M33610-13-T-0013

Air Force contract # FA8726-19-F-0057

We would like to procure an experimental license and respectfully request to use this experimental license to install a GPS "repeater" inside one of our aviation hangars. This will assist in the rapid and efficient ground testing of critical equipment prior to flight resulting in more economical flight testing.

Kind regards,

Craig O'Hearn
