

NARRATIVES

Section 7. of FCC Experimental License Application (form 442)

AeroTEC Inc. is an Aerospace Test, Engineering and Certification company. We test, troubleshoot and certify multiple Part 23/Part25 aircrafts and systems (STC, etc.).

The purpose of a GPS Repeater system in hanger is for indoor testing (door closed) of systems and aircraft requiring advanced avionics (example IRS, GNSS).

Having a GPS Repeater would not only benefit our company but the industry as a whole. Our current program/aircraft will reduce emissions and help to replace many out of date and aging aircraft.

Section 12. of FCC Experimental License Application (form 442)

AeroTEC Inc. is an Aerospace Test, Engineering and Certification company. We test, troubleshoot and certify multiple Part 23/Part25 aircrafts and systems (STC, etc.).
