Subject: Additional Information Request

---

Message:

I hope you are doing well during these unusual times. I am writing to address your recent inquiry as stated here: "Have you ever pre-coordinated with Army and if so, please provide the date of coordination."

This was in reference to Application 0240-EX-CN-2020 regarding C2 for UHF. However, my answer also applies to Application 0323-EX-CN-2020 for Aircraft Telemetry as well. We have been coordinating with White Sands Missile Range (WSMR), specifically with Flight Safety Officers at the Range Operations Directorate. Our coordination began on February 26 by working through Spaceport America who coordinates with WSMR on airspace and frequency usage. This culminated to a comprehensive briefing that was provided to Spaceport America and WSMR on April 13. Since then, we have been meeting weekly and we are coordinating our airspace and frequency usage through an Operational Requirements document, which is currently with WSMR for approval. They have not had any issues with our frequencies and our proposed operations at high altitude. Please let me know if this addresses your concerns for both applications 0240-EX-CN-2020 and 0323-EX-CN-2020. We are in urgent need of our C2 and FTI approvals as we would like to begin testing at the end of May. Thanks for your assistance in this matter.
