Subject: File Num#0272-EX-CM-2018 reminder on FAA pre-coordination data request

---

Message:

The Federal Aviation Administration (FAA) coordination as to 5040-5050 MHz is part of the file, having been uploaded on December 15, 2018.

Please consider this note as a request to extend the time to secure coordination with the Federal Aviation Administration (FAA) as to the 5091-5101 MHz segment, which is part of the original application, 0677-EX-CN-2018. AeroVironment has provided information, including filing a coordination request on December 15, 2018. As the Commission can understand, the federal government furlough has delayed consideration. We are pursuing FAA's concurrence and guidance and believe a resolution will evolve shortly.

We appreciate the Commission's understanding. Please let us know any questions.
