Instructions

- Lump together identical items (like circuit boards, batteries, antenna, lids)
- Get smallest area from the L, W, H dimensions (this is the worst case orientation)
- For tether collision assessemnt, Use AC5 body and one end and Tether cover (8x8x0.5cm, 20 grams) as other (tether is 75mm wide, by like 0.1mm thick and 12 meters long)

NOTES:

- Headings for subassemblies are in BOLD
- Purchased items are in shaded Part Number cells.
