Subject: Re: NOAA licensing for PicoSatellites

Jerry,

Thanks for providing your mission profile to NOAA. NOAA understands that the mission profile is to: "demonstrate various nanosatellite and picosatellite technologies, and perform GPS radio occultation measurements for the U.S. Air Force." We also understand that Aerospace will operate the satellites as a federally funded research and development center (FFRDC) on behalf of the United States Air Force, the National Reconnaissance Office (NRO) and all national-security space programs. Based on these understandings, a NOAA license is not required for you to operate these satellites. Furthermore, unless the nature of Aerospace's relationship changes with the Air Force or NRO, you do not need to inform NOAA of any future projects where Aerospace will operate satellites on behalf of the U.S. Government.

Dave,

Assuming the conditions outlined in the email are still valid, then you are correct--you do NOT need to submit a form
