Hi Nimesh,

I am just back from travel last week and I am getting to the corrections on our other applications. I did however want to point out this application. It is filed such that we are the ground segment for the Univ of Minnesota mission. They filed their own application for their satellite (0385-EX-CN-2019) and The Aerospace Corporation ground network is mentioned in their "Technical Description" exhibit. Please LMK if everything is correct.

Thanks and regards,

David.
