Question 4: Statement Regarding Government Contract

This authorization is to fulfill requirements pursuant to Defense Technical Information Contract FA8075-14-D-D0014. The work performed under this contract includes research and development of capabilities during both ground and flight testing on Raven Aerostar high-altitude platforms. This specific frequency request is to provide communication capabilities on the flight vehicle that enables this testing. The specific details of the work being performed is designated by the US government as Controlled Unclassified Information (CUI). Further disclosure will require coordination with the controlling agency.
