Subject: Request for Info - File # 0371-EX-CN-2021

---

Message:

Dear Hung Le,

All of the Earth Station Terminal Antennas are parabolic reflectors. I searched around and can see a requirement for &quot;Space-to-Earth&quot; (Space Stations) requiring a unique antenna dimensions nomenclature, however, I cannot find guidance for Earth Stations.

Can you please clarify, or provide the rule so I can provide the requested information properly?

Thanks in advance,

Arthur Larson
