Subject: Additional Information Request

---

Message:

1) In response to question 1, we would like to keep the Technical Exhibit confidential. These materials contain trade secrets and proprietary information and are not customarily released to the public. Public disclosure of this information might be harmful to the company and provide unjustified benefits to our competitors.

2) In response to question 2, the additional frequencies requested are to accommodate Galileo and GLONASS GNSS signals in addition to GPS. The GPS receivers we are testing are combined receivers that receive GPS, GLONASS, and Galileo signals and we would like to test reception of all of these. The amplifier of the re-radiator system that we would like to use is compatible with all of these frequencies.
