

SUBJECT: Modification in Experimental License (Call Sign: WG2XHO)

Dear Sir/Madam,

This application is filed to request the license for higher BTS Power & ERP. The current license of 10W ERP is not providing the sufficient coverage footprint for the field testing of our eNB solution.

This application has been filed to update the followings:

1. The BTS Output Power = 40W , $ERP=46dBm(40W)+15.86dBd(\text{antenna Gain})=61.86dBm = 1.5KW$

A license fee of \$ 60 has been paid

Request you to process this application.

Thanking you in advance.
