AFTRCC will not consider positive coordination for permanent operations

of this device/technology in the Aeronautical Mobile Telemetry band
2360-2390.0 MHz.

AFTRCC additionally advises that the band 2345-2360 has be re-allocated on a primary basis to the Wireless

Additional coordination with WCS may be required.

AFTRCC database check confirms no current or conflicting assignments within the requested MIRAD.

Please reply via return email as to concurrence, non concurrence, scheduling, or other comments.
