

Waiver Request (if required)
Renewal of License KE2XAE

If it is deemed necessary in order to renew this authorization, American Broadcasting Companies, Inc. hereby seeks any waiver required to continue to operate INMARSAT terminals within the boundaries of the United States, in the event such INMARSAT operation is excluded due to the Mobile Satellite Ventures system (formerly American Mobile Satellite Corporation). American Broadcasting Companies, Inc. owns and operates two INMARSAT terminals, based overseas and to be operated within the United States only in the event of an emergency that disrupts normal communications infrastructure. The terminals would then be used during breaking news stories for communications and news coverage when no other means of transmission are available. Due to the rarity of such circumstances it is not logical to acquire separate equipment for use within the United States when the INMARSAT terminals, which can operate worldwide, are already in inventory.
