RE: NOAA Commercial Remote Sensing Regulatory Affairs License Inquiry

Dear Mr. Payne:

The National Oceanic and Atmospheric Administration (NOAA) Commercial Remote Sensing Regulatory Affairs Office (CRSRA) has received and reviewed your Initial Contact Form submitted on July 5, 2018. We have determined that your proposed mission does not require a NOAA operator's license. This determination is based on your description of the functioning of the Ambient Light Sensor, in your Initial Contact Form. This determination does not relieve you of the obligation to receive any other U.S. Government licenses, permissions or permits.

This letter applies to the MeshBed mission only. If the factual circumstances of the information provided change, please resubmit your Initial Contact Form. Additionally, please contact CRSRA with any future satellite missions you may plan to operate to obtain a licensing determination on that specific mission.

Sincerely,

A handwritten signature in black ink, appearing to read "Tahara D. Dawkins".

Tahara D. Dawkins  
Director, Commercial Remote Sensing  
Regulatory Affairs
