Experimental application 0137-EX-PL-2003

---

Message:

To whom it may concern.

Thanks for your response!!

The reason we made two separate applications is that the licensee needs their license as soon as possible. The previous application is only for non-Government frequency band and the other is for Government exclusive band..

We believe if we include the government exclusive band in the application, the processing time would be much longer than non government band. That is why we made separate applications. We do not want to add the new bands into our previous applicatoin.

Thanks,

Dong Shin
