Subject: Request for Info - File # 1027-EX-ST-2019

Message:

"Provide the name and call sign of any space station(s) used for a point of communication."

The only satellites used for this project involve a pre certified radio module from Iridium, 9602 and 9523 models. Those radios will be on the Iridium satellite network. The device will likely be communicating to 1 of the 66 satellites. Please clarify what call signs and names would exist for space stations.

Thanks,
