All three of our bands will have an emission designator of J3N according to section 2.201 of the FCC rules, where J represents a Single-sideband, suppressed carrier, 3 represents A single channel containing analogue information and N represents No information transmitted.

Our antenna that has a beam width at half-power point of 66.00 will have a bandwidth of (+/-) 87.5 MHz. Our other two antennas which have beam widths at half-power point of 10.60 and 6.80 will have a bandwidth of (+/-) 250 MHz.
