December 12, 2019

Applied Radar, Inc hereby requests that the fee be waived for this FCC experimental license application. The reason is that we previously paid the fee last year, and our application was not completed, and dropped out of the system. The previous FCC examiner retired and stopped answering our questions. The email below from FCC says there is a "bug in the system" that prevented us from being told why our previous application was denied. We were told to resubmit the application. Please reference the email below.

Sincerely,
Bill Weedon

Subject: Re: OET Experimental License Dismissal Notification, Call Sign: File Number: 0832-EX-CN-2018

Ok thanks. We did not receive the email in November. Will refile as you suggest.

Thanks,
Bill Weedon

Mr. Weedon

Sorry for the confusion. There is a bug in the system and it dropped the text explaining the dismissal.

The application has been pending and the last correspondence with Rodney Small was from November. He had asked that you upload an exhibit that describes the purpose and description of the experiment. There was no response uploaded from Applied in response to his request since November. Rodney is no longer working in the branch. Therefore the application is still incomplete and we do not have a full description for another staff member to complete the application. The system has closed this application out.

You may refile using the previous application as a template to copy the data and then one of the engineers can proceed to work on the application.

Regards,

Can you please tell me why this application is being dismissed? We have emailed you several times in order to update the application to remove the UHF request and keep the two other bands at S-band and X-band.

Regards,
Bill Weedon
