

STA Frequency Alteration Exhibit

Area-I, Inc.

Area-I has submitted a change to the STA application, updating the operating frequency range from the previously requested 2345 – 2360 MHz, to the newly requested 2450 – 2470 MHz. This is done to prevent interference with the SiriusXM (SDARS): 2320 – 2345 MHz and WCS: 2345 – 2360 MHz. Area-I and SatCom Law mutually agreed on the re-defining of the requested frequency band.
