

The following changes were made:

Antenna 1:

The radius of operation was changed to 25 km from 15km. This is to accommodate a local testing location that is further from the Artis, LLC offices than the 15 km originally requested.

All Antennas:

The frequency was changed from between 3300 MHz and 3400 MHz to between 3500 MHz and 3650 MHz. This was a mistake in the original application. (A different radar by the same manufacturer uses the lower frequency range). The radar only uses 20 MHz of the requested spectrum. If the whole spectrum requested is unavailable please let us know what portion between 3500 MHz and 3650 MHz may be used and we will modify our application accordingly.
